Mohammadreza Zare Amarghani

Software Developer · Backend, Databases & Automation

Mashhad, Khorasan Razavi, Iran

- mrzroot.github.io
- github.com/mrzroot
- linkedin.com/in/mrzroot
- t.me/mrzroot

Software developer focused on **backend services, databases and process automation**. Hands-on experience analysing and integrating the information systems of the **Khorasan Razavi Chamber of Commerce, Industries, Mines and Agriculture** (SQL Server, MySQL), building internal web systems (operational budgeting, SMS management, arbitration centre) and shipping 15 open-source projects in Python, TypeScript and Go. Master's student with a thesis in deep learning.

CHAMBER OF COMMERCE PROJECTS

Data governance & integration for the Khorasan Razavi Chamber's systems

SQL Server · MySQL · Python ETL · DBML · OpenAPI 3.0 · Postman · SSO

- Analysed the schemas of 9 MySQL systems and a legacy SQL Server database (100+ tables plus views, stored procedures and functions).
- Produced identity cards for 25 systems, a data catalogue and a data-sensitivity matrix.
- Designed a Python ETL into a unified master database (golden record) and a 360° member dashboard.
- Modelled the ERD in DBML, specified APIs in OpenAPI 3.0 with a Postman collection, and wrote the target architecture for a unified SSO portal.

Operational budgeting system

Laravel · Vue 3 · TypeScript · Inertia · MySQL/MariaDB · IIS

- Web application with role-based access (admin, manager, employee, viewer) and a DBML-designed schema.
- Deployed on Windows Server + IIS with a one-step install script.

SMS management system for the Khorasan Razavi Chamber

Python · Flask · Waitress · SQL Server (pyodbc) · SQLite · openpyxl

- Excel import/export, Jalali dates, finance and follow-up reports, audit logs, admin panel and backups.
- Runs as a Windows service; covered by automated tests.

SKILLS

Languages

Python · SQL / T-SQL · TypeScript · JavaScript · Go · PHP

Databases

SQL Server · MySQL / MariaDB · PostgreSQL · SQLite · Redis

Data modelling, ETL, stored procedures & views, data catalogues

Backend & APIs

Django / DRF · Flask · FastAPI · Laravel · Node.js · REST · OpenAPI · MCP

Frontend

Vue 3 · React · Tailwind CSS · RTL UI

Infrastructure & tools

Git / GitHub Actions · Docker · Jenkins · Windows Server / IIS · Linux

Networking

CCNA / Network+ level knowledge (Cisco Packet Tracer labs), MikroTik configuration.

Web system for the Arbitration Centre of Iran Chamber, Mashhad office

Vue 3 · Vite · Pinia · Django REST Framework · Token auth

- Case filing and tracking, arbitration-fee calculator and staff workflow with a right-to-left UI; MVP delivered to the client.

SELECTED OPEN SOURCE

MihanStack TypeScript

Local emulator for Iranian payment and SMS APIs (Zarinpal, Zibal, Kavenegar, SMS.ir) with failure scenarios, webhooks and record/replay; 62 tests.

dibs Python

Guards hand-made edits against AI coding agents via git hooks and MCP; zero dependencies, 49 tests.

hamyad TypeScript

Shared project memory for AI tools: MCP server on stdio and Cloudflare Workers.

marz · sabr Go

Service-reachability scanner for sanctioned regions (WebAssembly, SARIF) and resumable git/docker downloads.

dokhaneh · flowpilot Python

Release mirroring to GitHub and Iranian hosts with Ed25519-signed manifests; self-hosted workflow automation with Telegram.

paknevis · netdoctor-ir Python

Persian text linter and auto-fixer; connectivity doctor and mirror switcher for developers.

EDUCATION

M.Sc. (in progress)

Imam Reza International University, Faculty of Engineering

Thesis: A hybrid CNN–Vision Transformer framework for intelligent plant-disease classification with explainable AI (supervisor: Dr. Akbarzadeh Sharbaf)

PyTorch, PlantVillage (54,305 images, 38 classes), Grad-CAM; up to 99.15% test accuracy.

LANGUAGES

Persian: native

English: technical reading & writing
